

# CURLING

## WATER TREATMENT SYSTEMS

When you want to provide the best sheet of curling ice possible, choose Jet Ice water treatment systems to ensure consistent ice from end to end. Jet Ice water systems are affordable, even for the smallest clubs, and can be customized to meet the dynamics of your specific requirements.

## RENTAL SYSTEMS

Our standard Curling Rental System includes: Resin exchange tanks, water meter, hoses, shut-off valves. Portable rental system is easily connected to your incoming water supply.

## SYSTEMS CAN BE CUSTOMIZED TO:

- Increase capacity where water quality is particularly poor, utilizing a double tank system
- Increase capacity by removing high levels of specific contaminants such as calcium or carbonates
- Include carbon block filters to ensure the removal of excess chlorine and organics

## PRO-ICE®

DEVELOPED BY ICE MAKERS, FOR ICE MAKERS

If your facility wants a permanent solution to poor quality water then call Jet Ice to discuss the Pro Ice state-of-the-art reverse osmosis system for your club. Packages consist of a single or double membrane system with 200 to 400 gallons of storage, to suit demand and available space. Tank configurations are varied to accommodate space and access restrictions.

The Pro Ice system is an effective fixed asset that will provide consistent high-quality water for many years to come.

## INDUSTRY ACCOLADES:

“I use this system in our Provincial Events and also in my own club. I recommend Jet Ice to any ice technician to improve their ice conditions.”

Darrin Sinclair  
OCA Head Ice Technician

“The curlers and ice technicians appreciate the high quality of Jet Ice products.”

Hans Wuthrich  
CCA Head Ice Technician

“Jet Ice consistently provides championship products and services.”

Dave Merklinger  
CCA National Ice Technician
