BUILDING RELATIONSHIPS: QUEBEC'S INDUSTRY LEADER

Zamboni Robert Boileau is the corporate location of the Zamboni Company in Quebec. Since its original partnership with Zamboni began in 1993 as an Authorized Distributor, the company has been building strong relationships earning the trust of arenas while representing, selling and servicing:

- ✓ Zamboni - Ice resurfacers, edgers, Level-Ice laser leveling system, FastICE advanced ice making system and Zamboni Authentic Parts
- ✓ Jet Ice - Ice paints (Super White 3000 and colours), logo reproductions, water treatment systems

Our team is dedicated to meeting the needs of our customers, providing product solutions and unparalleled service. Zamboni machine rentals, maintenance contracts, certified training programs and Zamboni Authentic Parts ensure smooth arena operation. With a full range of ice arena services, 24/7 telephone support and mechanical service in the workshop and on the road, customer support is always within reach.

Building trusted relationships with a commitment to quality service, we maintain the lowest cost of ownership, exceptional performance and extended life of the equipment. In a territory with ever-growing needs, Zamboni Robert Boileau is uniquely capable of providing solutions which add value for arena operators.

LEVEL-ICE®

AUTOMATED PRECISION BLADE CONTROL PROVIDES CONSISTENTLY LEVEL ICE AND SIGNIFICANT SAVINGS OF ENERGY, WATER AND TIME.

Exceptional Accuracy

Laser and receiver units work together to provide an accurate reference point to within a half millimeter, allowing the ice to be built to an even and optimal height and dramatically reducing ice maintenance needs.

Automatic Blade Adjustment

Programmed settings maintain a minimum and maximum cut standard which can be controlled by one user, allowing a consistent resurfacing from the entire ice maintenance team.

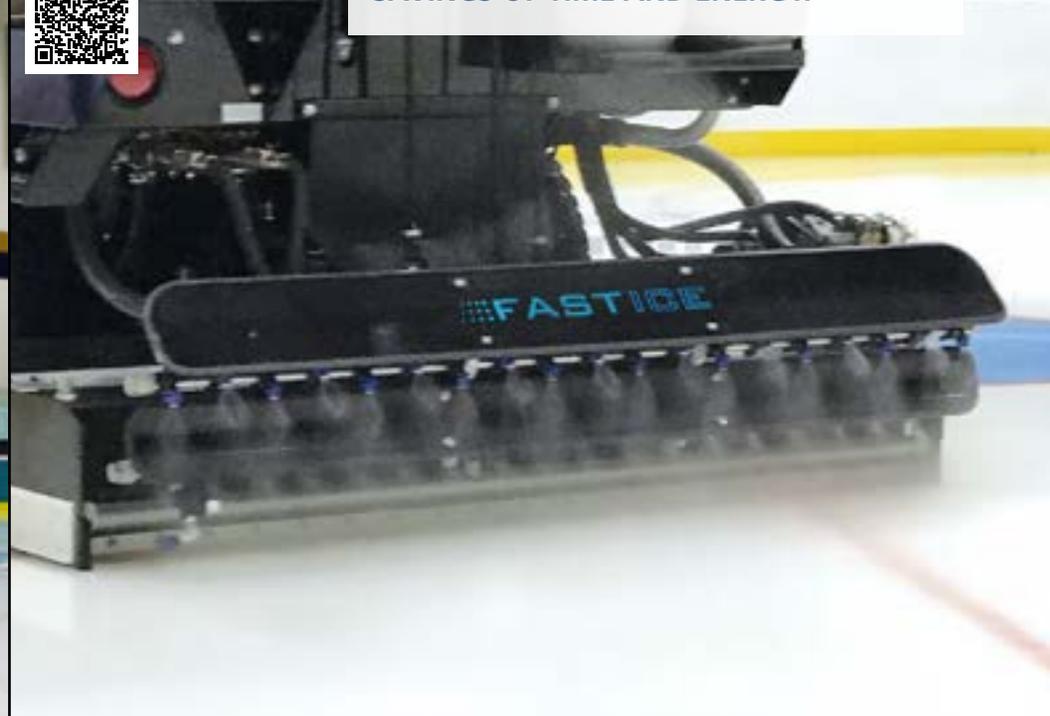

Efficiencies Deliver Savings

Reduced wear on the ice resurfacer and extended blade life. Significant savings from reduced energy and water consumption, less labor, and more ice time to sell.

FASTICE ICE MAKING SYSTEM

CREATE SUPERIOR ICE WITH AN ACCURATE AND AUTOMATED HIGH PRESSURE FINE MIST WATER APPLICATION, RESULTING IN SIGNIFICANT SAVINGS OF TIME AND ENERGY.

Save Time and Resources

Less gases trapped in the ice minimizes the need for temperature adjustments. Build ice faster at higher temperatures. Use significantly less water.

Superior Ice Surface

Precision spray nozzles deliver a pressurized mist of fine droplets for exceptionally accurate control of water distribution at any speed. Less snow pickup and disposal.

Digital Console

Live data for spray volume, ground speed, water flow and application rate scaling, water pressure/temperature and total water used. Output to USB for reporting.

A NEW PARTNER IN RINK MANAGEMENT. MONITOR CONSUMPTION AND OPTIMIZE PERFORMANCE WITH PREDICTIVE INSIGHT AND RESOURCE MANAGEMENT.

Predictive Maintenance

Automated daily, weekly, monthly and annual preventative maintenance reminders are programmed using your machine model's maintenance schedule. Digital maintenance log documents your on-site service activities.

Resource Management

Displays ground speed during resurfacing, consumption of fuel/ electric and IMW. Fuel details include: RPM and engine coolant temperature. Electric details: charge temperature and charge duration.

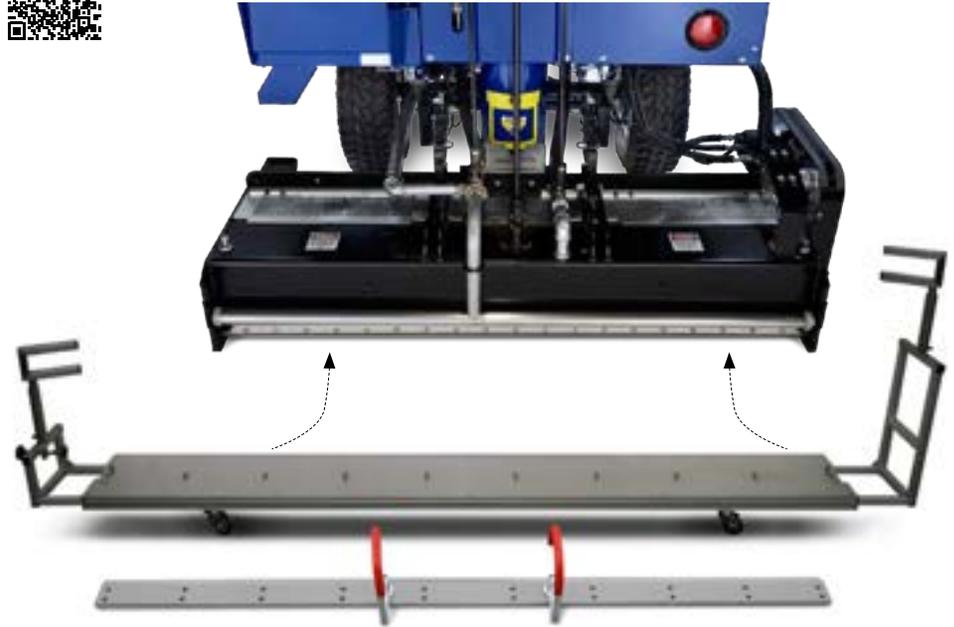

Access Anywhere

Not on-site? Login to the web or mobile app from your computer or any IOS or Android device and you have instant access to remotely oversee the operation.

BLADE CHANGING ASSISTANT

PERFORM A SAFE, QUICK AND EASY INSTALLATION OR REMOVAL PROCESS WITHOUT EVER TOUCHING THE EXPOSED BLADE

Touch-free Blade Change

Magnetic handles secure the blade for movement from sheath to the Blade Change Assistant and back to the sheath. Operators do not need to make physical contact with the exposed blade.

Ease of Operation

Roll the Blade Change Assistant under the conditioner to position and secure with telescoping handles. Adjustment button and bolt precisely align the unit to further simplify blade installation/removal.

Convenient Bolt Access

The spring-loaded hex pin system holds the screws in place so the operator can loosen or tighten them from above, providing additional safety and comfort by eliminating the need to work from underneath the conditioner.

MONTREAL & QUEBEC SERVICE CENTRES

Zamboni Authentic Parts and Accessories

Zamboni Authentic Parts are specifically designed to ensure optimal performance. They provide superior performance and durability. Beware of imitations that may damage your machine and jeopardize the manufacturer's warranty. Our Parts Department is fully stocked and can arrange delivery within 48 hours or less.

Zamboni Robert Boileau offers innovative arena accessories:

- ✓ Charger rack
- ✓ Dyna-Scrub® board brush
- ✓ FuelMaker® compressor and replacement parts

On-Site Service

At Zamboni Robert Boileau, Customer Service has always been the priority. Our service vehicles are outfitted for complete service and expert support at your arena, no matter what Zamboni model you have. Our service technicians are trained and certified for LPG and CNG calibration. Our fleet of electric resurfacers is the largest in Canada. We have the tools and expertise to help maintain your equipment with the direct support of the engineering and service teams of the Zamboni manufacturing facilities.

Workshop Repairs

With our conveniently located service workshops in Montreal and Quebec City, we can support your needs for major repairs and seasonal service. Whether your machine has a complicated repair or requires a complete overhaul, it is in good hands with our experienced technicians. Our specialized transport provides door-to-door transportation of your resurfacer from the arena to our service workshop and back. If you prefer to coordinate your own transportation, let our service team know.

Maintenance Plan

We offer on-site maintenance plans which are flexible and help to continuously monitor the condition of your valuable equipment. Ask for a quote and our team will provide you with an honest and detailed assessment. With a variety of services, you can choose to give your Zamboni machine the attention it deserves with factory certified maintenance and a complete repainting of your resurfacer. During the service, you can take advantage of the opportunity to add optional equipment such as the automatic snow breaker, tire wash, advanced watering system and other valuable additions at a reduced cost.

Seasonal Storage

Once the ice season is over and your ice resurfacer is not in use, it often takes up space that your facility needs for other storage. During the extended period of downtime, the machine still requires routine maintenance. Electric resurfacers must be connected to the charger periodically to maintain the balance of the module and keep the batteries in optimal condition. Zamboni Robert Boileau can safely store your unit, monitoring the needs of the batteries onsite in our facility until season begins and you are ready for delivery.

Refurbishment Service

Give your Zamboni machine a second life. While Zamboni machines have the lowest cost of ownership, over time, your machine will require increasing maintenance due to wear and tear. Corrosion, damage and parts which need replacement result in a deteriorating condition. When your budget does not allow for replacement with a new machine, you can opt for a complete refurbishment of your existing unit. The high quality of the machine you originally acquired allows you to invest in the future by

refurbishing the unit, getting many additional years of operation. Following a thorough, detailed inspection, Zamboni Robert Boileau will provide you with an honest and accurate quote. While your machine is in our service workshop, take advantage of this time to have it completely repainted and to consider adding optional equipment to increase the value of your machine, at a reduced cost.

Zamboni Rental

Our large fleet of rental units in both Montreal and Quebec is available for your needs. Rentals are available during machine repairs, for temporary needs and even for a long-term lease. Ask about our long-term lease option to purchase the rental unit. With the largest Zamboni fleet, Zamboni Robert Boileau has the rental equipment to suit your needs: electric or fuel, for as short as a day, or as long as a year.

Operator Training

Zamboni Robert Boileau offers an on-site training program for operators at your facility. The goal is to educate your operators in the safe and proper use of the machine, while producing the highest quality ice surface. The Zamboni Robert Boileau operator training course is chartered by the Labor Market Partners Commission (CPMT). We invite you to check the eligibility of your training expenses under the law with Emploi-Quebec.

BOOTCAMP
TRAINING NEVER STOPS

Paint Application

There is only one way to achieve the best quality in ice paint and logo application: hire the experts! We take pride in our decades of experience and the satisfaction of our customers. Your ice sheet will efficiently be painted and receive three coats of Super White 3000 using our exclusive Jet-Mobile cart. Hockey lines and specifications for other ice sports are accurately painted according to the industry measurement standards. We have a variety of logo application processes and services.

Jet Ice® Paints and Arena Products

Zamboni Robert Boileau is your exclusive authorized Jet Ice® distributor in Quebec. Jet Ice is renowned for its quality ice paints and in-ice logos. We offer the famous Super White 3000 coating, as well as the liquid paint in all the colors of the Pantone® chart. See our website arenazone.com/jet-ice to learn more about Jet Ice products. Our complete list of replacement parts and components for sports facilities and ice rinks helps to make sure you can keep things running. From polyethylene for dasher boards to netting, goals and goal padding – we have it all.
